

DAVID AGHASSI

FULL STACK DEVELOPER

LinkedIn: bit.ly/aghassi
GitHub: github.com/aghassi
david.aghassi@icloud.com
(201)-230-8547

Education

Case Western Reserve University

Graduation: Dec 2016

Bachelor of Arts and Science: Computer Science and Economics
Minor: Entrepreneurship

Experience

IBM UrbanCode

Jan 2015 - Aug 2015

Frontend Developer / Software Engineer - CoOp

Worked on UrbanCode Deploy, as well as UrbanCode Release. My task was to work on bringing down the number of defects in the Deploy. Each defect required tests to be written to validate the fix worked as expected.

I was later moved to Release to work on front end development since the Lead developer was leaving. I replaced him for the last three months of my internship.

Languages used varied between Java, CSS, JS, HTML, and Dojo.

Projects

Find My Bus NJ

findmybusnj.com

While commuting over the summer of 2014, I found the lack of a straight forward NJ Transit bus app annoying. So I created my own!

Notify

github.com/aghassi

I decided one weekend I wanted an app that would send me notifications when Spotify changed songs with information on the song. I spent the course of a week doing a rapid prototype in Swift with a friend. The app not only works with Spotify, but with iTunes also. The code is available on GitHub.

Swing Club Website

swingclub.case.edu

As webmaster of Case Western Reserve University's Swing Club, I worked to rebuild my club's website from the ground up. I used GruntJS and NPM to automate the build process. The site is built using Bootstrap, AngularJS, and JQuery.

Languages

HTML

Objective-C

Selenium

CSS

Java

The Intern

JS / AngularJS / Dojo

Swift
